

A healthy home is one that is dry, clean, pest-free, ventilated, safe, contaminant-free and maintained.

Please Join Us for a One-Day Course:

Healthy Homes for Community Health Workers

This training identifies root causes of health problems in homes and links them to **7 Principles of Healthy Housing**: keep it dry, keep it clean, keep it pest-free, keep it ventilated, keep it safe, keep it contaminant-free, and maintain the house. Course participants will develop a better understanding of how to make healthy homes a reality in their communities.

This course is targeted toward individuals who work as health advocates in their communities. Participants will gain insight into how housing and health are related, and learn actions they can take to improve the health of their clients. This course provides one-on-one and large group education on healthy homes, general advice about specific healthy homes problems, and recommends healthy homes approaches that families, landlords and other community members can take.

Date: November 18, 2021

Time: 9am – 5pm

Cost: \$10.00

Place: Virtual Training

***(Please register to get the Zoom link)**
